

Hallcon's Redmond EV Operations Center

# Private EV Fleet Charging

Remove every obstacle to charging your fleet.

Washington's largest private contracted charging facility is ready to charge your electric fleet. Designed specifically for private charging of commercial fleets, Hallcon's EV Operations Center delivers exceptional service, consistent performance, and reliable charging.

## Redmond's Premier EV Charging Solution is Ready to Power Your Fleet

Avoid the costs, delays, and complications of building or maintaining your own EV charging infrastructure, and sidestep the risks that come with unpredictable public charging sources.

Hallcon's secure, purpose-built EV Operations Center provides:

### Guaranteed Power

High-capacity, Level 3, dual-port chargers supported by 5.0 megawatts of power and 1.5 megawatts of backup power provide ample power to charge up to 300 vehicles each day.

### Valet Service or Drop-Off

Our team can pick up vehicles from your facility and return them fully charged, or you can drop them off at our charging center and pick them up when ready.

### Contractually Reserved Charging

Secure the charging your vehicles need by contract, ensuring they're ready when you need them. We manage the schedule and prepare vehicles for timely deployment, meeting your operational demands.

### Full-Service Management

Hallcon manages all charging operations, monitoring, infrastructure maintenance, reporting, analytics, and direct integration with your daily operations eliminating the need for EV expertise or dedicated staff.

### Fleet Performance Data

Access detailed analytics on energy use and vehicle status to support vehicle maintenance, operational efficiency, and sustainability objectives.

# Stress-Free & Seamless EV Charging

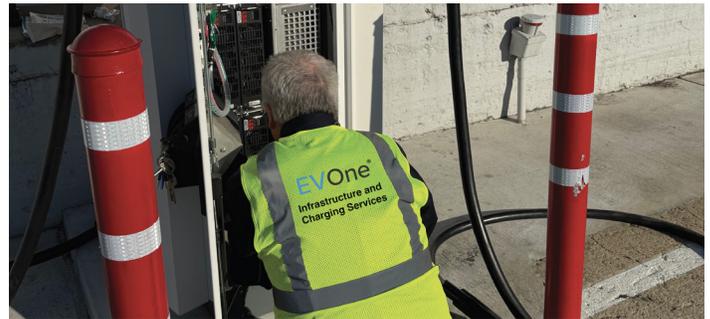

## Integrated Into Your Operations: No Headaches, No Complexity

Hallcon embeds EV charging directly into your daily fleet workflows, managing scheduling, operations, and analytics so you never have to handle infrastructure, staffing, or technical issues. You stay focused on your priorities while we handle every charging detail behind the scenes.

### Remove every obstacle to charging your fleet

Skip the expense of land, construction, and hardware, avoid large up-front costs for your EV transition.

### Consistent Budgeting

Monthly fees cover all charging, maintenance, and support, supported by service level guarantees.

### Built-In Redundancy

Enhance your existing charging capacity, manage overflow, or use Redmond as your primary base for EVs.

### Quick Start Fleet Readiness

Launch or scale your EV fleet immediately, without the lengthy construction delays or power upgrades.

## Act Now to Secure Your Charging Power Today

Schedule a private consultation to create your tailored EV strategy before availability runs out.
